

# Governor's Newsletter.

The new governors are all settling well into their role of challenging and supporting the head teacher. As volunteers they give up a lot of their time for training as well as reading up on paperwork.

One of the governors' duties is to agree various policies for procedures in school, and monitor that these are working. Recent policies that have been looked at are choking policy and supporting children with medical needs. These followed recent first aid training for staff.

Another area that the governors help to manage is the building and its maintenance. Premises committee members inspect the building, inside and out, for any repair needs and help to decide who should carry these out. The most recent was replacing and moving the water heater which had been subject to flooding.

Finances are on the agenda for every meeting, and it was good to see that the school is on track to stay within its budget again this year.

Governors are also involved in staffing arrangements, and discussed the best way to cover Miss Pape's maternity leave.

Finally, the school is always

interested in parents' views and the latest parent feedback survey was discussed. Don't forget to log onto 'parentview' to give OFSTED your thoughts, and if you need to contact the governors directly please do so through the clerk, Mrs Davidson.
